Q.1) int arr[]={1,2,2,3,3,4,4,4,4,5,5,5,5,5} alter array in such way that the element which occur most times will print first. sample output-
arr[]={5,5,5,5,5,4,4,4,4,2,2,3,3,1};

O/P:

```
...    [5, 5, 5, 5, 5, 4, 4, 4, 4, 2, 2, 3, 3, 1]
```

Q.2) Write a Python program to find if a given string starts with a given character using Lambda.

```
#Q.2) Write a Python program to find if a given string starts with a given character using Lambda.
check = lambda s, ch: s.startswith(ch)

print(check("Python", "P"))
```

```
...    True
```

Q.3) Write a Python program to filter a given list whether the values in the list are having length of 6 using Lambda

```
['Python', 'Laptop', 'Mobile', 'Camera', 'Bottle']
```

Q.4) Write a Python program to create Fibonacci series upto "n" using Lambda.

```
...    [0, 1, 1, 2, 3, 5, 8]
```
